**Innovative products that improve peoples' lives**

**A company on the move.  
Products that move people.**

Swiss Medica is a company dedicated to the distribution and marketing of clinically tested, patented, all natural health solutions that address the conditions caused by chronic ailments including pain and premenstrual syndrome. Across North America, people have seen the value of our products, allowing us to grow our distribution base through virtually every major pharmacy retailer.

Our increasingly popular products meet the demands of a fast-growing market - as recent statistics show that more than 60 per cent of North Americans have tried at least one form of alternative medicine. We believe that this is only the beginning of a dramatic shift in how consumers approach their own health - and that the use of alternative products will grow exponentially as they continue to discover the benefits of natural products.

Our patented products are designed to provide natural, over the counter, safe alternatives to prescription products.

## **O24™ Pain Neutralizer** - it works!

"I found a sample of this at CVS/Pharmacy last night. I was in so much pain and was in tears by the time I made it to the pharmacy counter. When I got home I had my daughter rub it all over my back and it was honestly the most relief that I had felt in the past 3 years."

--- Dawn

"I was given a sample of your product by a friend. I joked that the package wasn't big enough to cover my pain. Well, that package lasted through 3 applications and eased my pain so much that I did not require my meds!"

--- Elizabeth

## **O24 Fibromyalgia™** - Our science says it all.

In the patients suffering from fibromyalgia examined in the course of this study, the application of O24™ three times a day over a period of 5 days resulted in a significant pain relief...On account of its excellent efficacy

and tolerance, the preparation can thus be recommended to patients suffering from fibromyalgia to support their analgesic therapy.

**PMS Escape®** - The science says it works.

Twenty four women with confirmed PMS took PMS Escape® or placebos for three menstrual cycles after a 1-month placebo run-in period, in a double-blind placebo-controlled study. Patients were tested for mood, cognition, and food cravings, using an interactive computer- telephone system, during the Luteal phase of the menstrual cycle. PMS Escape®, but not the placebos, significantly decreased self-reported depression, anger, confusion, and carbohydrate craving, and improved memory word recognition.
